

Supporter Experiences

K.P. Served as a Supporter in Fall 2017

It has already been 2 months and a half since I have been doing an internship as a FIX supporter. My goal right now is to get a job in Japan, and FIX helps me a lot with preparing myself for job-hunting. There are many guest-speaking who will motivate and give you lots of knowledge about preparing yourself. Your Japanese ability will improve tremendously since you will have to write meeting record in Japanese as well as a group discussion. If you are looking for a place to gain experience while improve you Japanese language ability, this is a place for you.

A.M. Served as a Supporter in Fall 2017

FIX gave me the chance to get an overview of Japanese companies by shadowing a profession in KUMON. This internship made me responsible, punctual, reliable, innovative and initiative. I was able to practice communication and teamwork skills. It enhanced my academic, career and personal development. It gave me a feeling of working with family, where I was able to share my achievements, failures and everyday life. All the supporters and super supporters were connected and advised each other to work better and efficient. I could understand what skills I need to gain in the student life to perform better in my professional life.
