- 2 The number of users per year that were submitted for AY2011 and AY2012 included the numbers for the "Others" (general public etc.) category, so the figures submitted this time are different.
- 3 The numbers of books borrowed per year for AY2011 was based on different evidence (i.e., different extraction conditions) than for AY2012 and AY2013, so the numbers used this time all use the same evidence.

The number of books is different as described below:

- The total has changed for AY2012 because books in test categories were included then.
- Before AY2012, usage by persons belonging to Ritsumeikan University was also counted, but from AY2013 onwards, this has not been counted.
