How to uninstall VirusScan Enterprise 8.8	1.0	Windows7 or higher

Notice of termination of McAfee VirusScan

- The university has provided the license of anti-virus software for Mac OS directed at members of the university (students and faculty and staff).

Due to the end of the contract with McAfee, Inc., the university will terminate providing license of McAfee VirusScan as of March 31, 2018.

Please be sure to uninstall McAfee VirusScan license obtained from our website by March 31, 2018, if you use this.

Moreover, if you continue to use our university license after April 1, 2018, it will be a license violation. Since license violation of McAfee VirusScan is attributed to the individual responsibility of the user, please be careful not to violate license.

Anti-virus software is available for Mac OS supported by manufacturers as a standard installation. From now on, please use them or purchase an anti-virus software by yourself.

1. How to uninstall VirusScan Enterprise 8.8 in bulk

(1) In this procedure, the tool will delete all "McAfee VirusScan Enterprise" and "McAfee Agent" at once.

It will automatically restart, so please shut down all running applications.

Please download the tool as follows. Click on the academic at the campus terminal.

The screenshot shows the APU Campus Terminal interface. On the right side, there is a 'Link' menu with several options: Campus Terminal Manual, Campusmate Web (APU), Library, **Academic** (highlighted with a red box), Research, Student Services, and Career. An arrow points from the 'Academic' link to the screenshot of the Academic Office Website below.

And then click on Academic Office Website.

Ant-Virus Information

Important Announcement

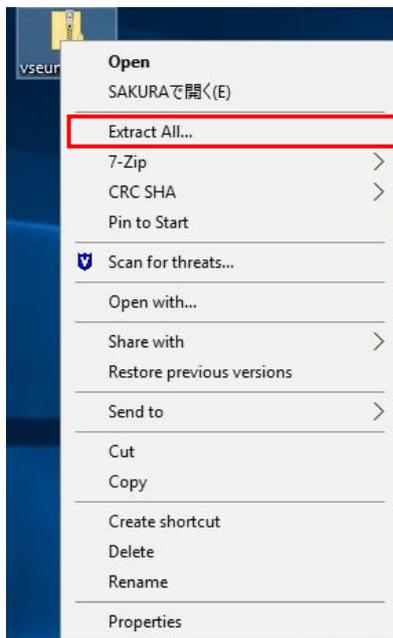

This school has provided its current students, faculty, and staff with Anti-Malware and Antivirus protection software licenses for Windows OS and Mac OS. As our contract with the McAfee company is ending, [licenses for school-provided antivirus programs will expire at the end of the contract period on March 31st, 2018](#). If you use anti-malware and anti-virus software downloaded through the school website, [please be sure to uninstall these programs by March 31st, 2018](#). Use of these software licenses from April 1st, 2018 onward will be considered a violation of the license agreement. Violations of the agreement will be the responsibility of the individual McAfee VirusScan users, so please be careful to avoid this situation.

Current versions of Windows OS and Mac OS include Anti-malware and Anti-virus software as part of their standard installation. In the future please make use of these default programs or purchase additional anti-malware and anti-viral software on your own.

How to Uninstall

	Windows OS	Mac OS
VirusScan Enterprise 8.8 (Uninstall)	Download (Bulk Deletion Tool) Manual (PDF)	Manual (PDF)

(5) Right-click the folder to decompress the downloaded VSEUNINST.Zip file,click on Expand All.

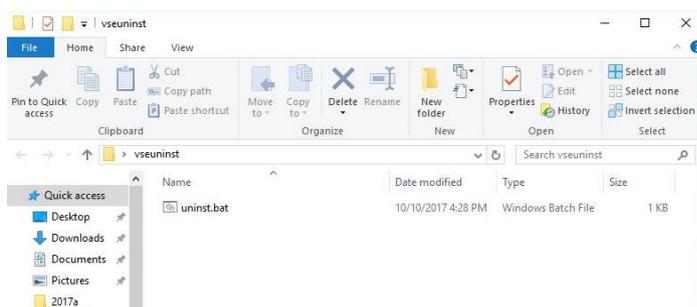

APU-NET ガイド	Ver	対象 OS
How to uninstall VirusScan Enterprise 8.8	1.0	Windows7 or higher

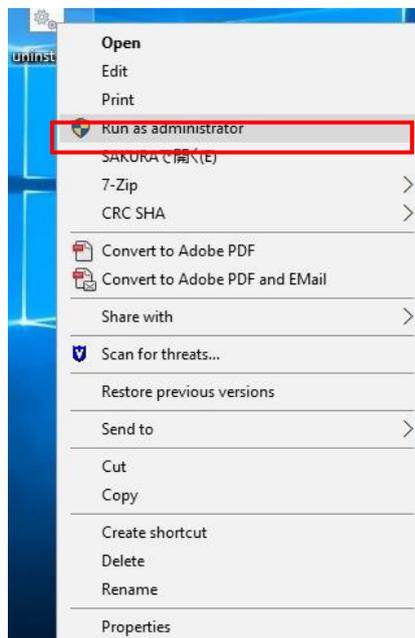

(6) Specify an arbitrary folder as the expansion destination of the compressed file. Here is an example of a desktop. It unpacks to "VSEUNINST".

(7) After decompression, uninst.bat will be created in the VSEUNINST folder.

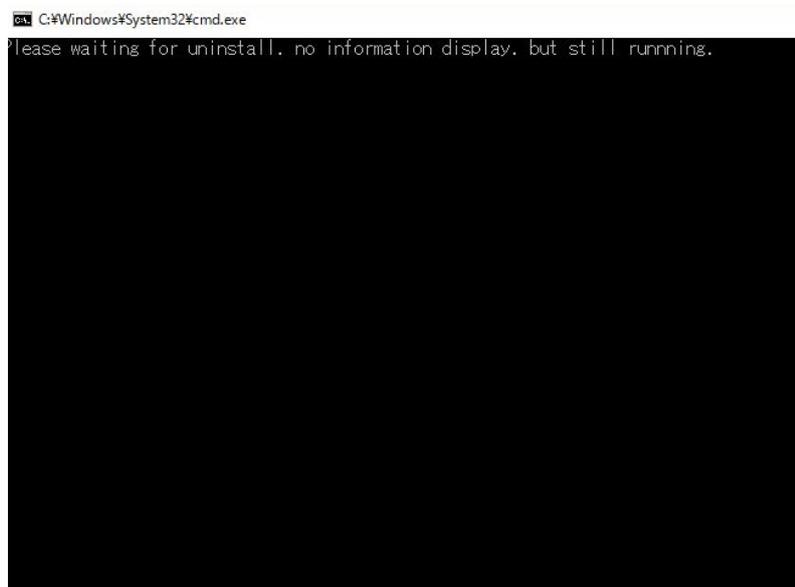

(8) Right-click "uninst.bat" and click "Run as administrator".

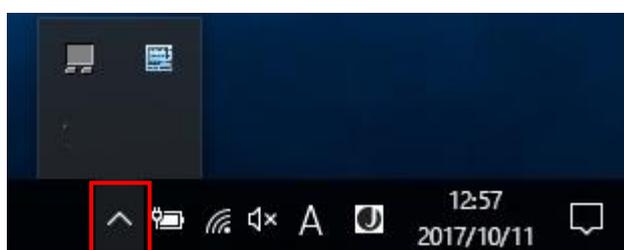

APU-NET ガイド	Ver	対象 OS
How to uninstall VirusScan Enterprise 8.8	1.0	Windows7 or higher

(9) The command prompt window will be displayed and Windows will restart automatically after a while.

(10) After restarting Windows, open the triangle button on the task bar and make sure that the McAfee icon is gone. If there is no icon, this operation is completed.

(11) If the McAfee icon remains when opening the triangle button on the task bar, please uninstall it manually as below.

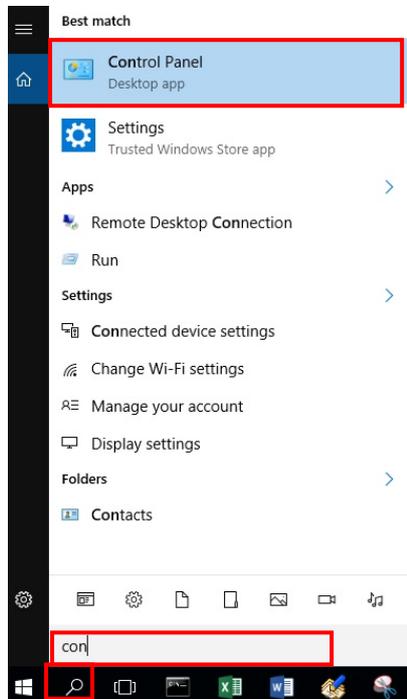

Please delete the downloaded zip file and decompressed file after uninstallation.
