

Watch our video to learn how to set up respon!

The video is narrated in Japanese language

Installing the respon app on your smartphone

respon provides you with real-time survey system and attendance management as well.

iPhone → Search for “respon” on App Store.

Android → Search for “respon” on Google Play’s “Apps”.

※ respon is currently available only in Japan region of App Store and Google Play.

※ The respon app is compatible with iOS9.0 or later and Android 5.0 or later.

※ The language displayed in respon depends on the system language of your device. If the language is set to Japanese, respon will also be displayed in Japanese. If it is set to another language, it will be displayed in English.

Setting up respon app

After installation, continue with the initial settings. Please proceed to this setting in a location with good signal conditions.

1. Launch the respon app, then tap “Settings” in the tab menu at the bottom.
2. Enter your APU email address and tap “register”. You will soon receive a mail with the confirmation number.

The screenshot shows the 'Mail setting' screen. It has a title 'Mail setting' in orange. Below the title, there is a grey box with the text: 'Register your mail address to start using respon. Enter mail address, then tap [Register]'. There is a text input field containing '____@apu.ac.jp'. Below the input field is an orange button labeled 'Register'.

In case your mailbox has a spam filter enabled, please set it up to receive all mails from the respon.jp domain.

3. Enter the confirmation number that you received via mail, and then tap “Next” to complete your registration. Note: the confirmation number is a six-digit number.

The screenshot shows the 'Confirmation number' screen. It has a title 'Confirmation number'. Below the title, there is a grey box with the text: 'Enter confirmation number'. There is a text input field. Below the input field are two buttons: a grey 'Back' button and an orange 'Next' button.

4. Next, set up your sever. Tap “Set up a server ID” to use respon in the school.
5. To complete server setting, enter the URL below, and then tap “Next”.

<https://respon.apu.ac.jp>

6. You will see the manaba login screen.
[Enter your ID and password](#), and then tap “login”.

The screenshot shows the 'Server setting' screen. It has a title 'Server setting' in orange. Below the title, there is a grey box with the text: 'Enter server URL, tap [Next] and log in with your User ID and password.'. There is a text input field containing 'https:// respon.apu.ac.jp'. Below the input field is an orange button labeled 'Next'.

7. After a successful login, you will see the final confirmation screen. Check your ID and name, and then tap “OK” to finish.

Let's start respon now!
