

Faculty Information

Sangho KIM

■ **Division:** Development Economics (DE)

■ **Research Area:**

International Trade, Economic Growth, Economic Development, Productivity Analysis, Environmental Economics

■ **Research Methods:**

Econometric Analysis, Quantitative Analysis

■ **Seminar Topic and Keywords:**

Applied Econometrics, Quantitative Analysis, International Trade, Economic Growth, Economic Development, Environmental Economics

■ **Seminar Teaching Method:**

Tutoring, Presentation, and Discussion

■ **Possible Research Topics for Students:**

Economic topics that apply various econometric analysis including micro econometric analysis and panel data model

■ **Comments:**

My seminar students must take my Special Studies (Development Economics) course in Fall semester in which I teach an introduction to econometrics. The course includes not only basic principles of the subject but Stata programming for application. Students can learn the basic regression technique that helps graduation research.
