

## Faculty Information

### Koichi YAMAURA

#### ■ Division:

Development Economics (DE)

#### ■ Research Area:

Disaster-induced preference changes and their dynamic economy-wide impacts, in the fields of agricultural and environmental economics.

#### ■ Research Methods:

Econometric and simulation methods.

#### ■ Seminar Topic and Keywords:

Food and Environmental (mainly sustainable energy) Economics, Consumer Preference

#### ■ Seminar Teaching Method:

Research presentation in seminar and consultation

#### ■ Possible Research Topics for Students:

Food and Environmental (mainly sustainable energy) Economics using regression analysis.

#### ■ Comments:

Students who are interested in being supervised by me should not use a "template research plan/proposal" when applying for the master's or doctoral programs, but should describe clearly what you want to research on your own. Students are required to attend weekly seminars. In addition, students are expected to comply with the research plan/proposal by themselves since the thesis in the master's or doctoral programs will be written by the student himself/herself.
