

Faculty Information

Luca Aquili

Specialization:

- Accounting and Finance (AF)

Research Area:

Behavioural Finance and Decision Science

Keywords:

Risk-taking, financial stress, optimism bias, delay discounting, neuroeconomics, machine learning

Seminar Topic:

Behavioural Finance and Financial Decision-Making

Seminar Teaching Method:

Students develop and refine an empirical research question through literature review, presentations, and individual supervision.

Possible Research Topics for Students:

Topics related to behavioural finance and financial decision-making.

Research Method:

Quantitative research.

Research Projects for Supervision:

- Master's Thesis

Comments:

This seminar is best suited to students who are comfortable with analytically demanding research and willing to engage with quantitative methods, research design, and data analysis. Students will receive guidance throughout the research process but are expected to take initiative and work independently.
