

Faculty Information

OKUYAMA, Ryo

■ Specialization:

Entrepreneurship, Innovation and Operations Management (EIM)

■ Research Area:

Innovation, Technology management, Healthcare, Pharmaceutical industry

■ Keywords:

Innovation, Technology management, Healthcare, Pharmaceutical industry, Biotechnology, University startup, Research & development, University-industry collaboration, Startup ecosystem

■ Seminar Topic:

Innovation and technology management in healthcare (pharmaceuticals, biotechnology, etc.)

■ Seminar Teaching Method:

One-on-one consultation based on the student's research presentation and progress report

■ Possible Research Topics for Students:

Topics are basically proposed by students. Potential topics are, but not limited to, innovation and technology management in healthcare/pharmaceutical/biotechnology sectors

■ Research Method:

Empirical research; both quantitative and qualitative methods

■ Comments:

You can develop critical thinking and analytical skills through your research project, which will serve as valuable assets in your future professional life. I will supervise you towards producing research with the potential of conference/journal publication if you want. I welcome students who pursue research with enthusiasm.
