

June 10, 2021

To all students, faculty, and staff,

Ritsumeikan Asia Pacific University

Implementation of Vaccination Policy at APU

On June 9, 2021, in response to the government's announcement to begin vaccination at companies and universities against COVID-19, the Ritsumeikan Trust has decided to implement a school-wide vaccination program.

In response to the school-wide policy, APU is currently working on the details of implementing the vaccination. To help us plan this effort, we will soon be conducting a pre-vaccination survey. (Please note that this is a survey, not an appointment for vaccination.) Vaccination will be completely voluntary, and no one will be forced to receive it.

After the survey is completed and the school determines how we will be implementing the vaccinations, we will inform all students, faculty, and staff how to make an appointment, when and where it will be held, as well as other relevant details.
