Notes:

1. Fill in the values for the blank cells. Shaded cells will be calculated automatically.
2. Calculate the "A/B", the "Ratio of AY2015 Enrollee to Total Department Enrollee (%)", and "Ratio of AY2015 Enrollee to Total College Enrollee (%)" and round them off to two decimal places.
3. Make chart by each individual degree program such as college, department, master's program, doctoral program, and professional graduate schools.
4. The "Type of Entrance Exam" column should be created according to the actual university circumstances. However, the "Regular Entrance Exam" column should include the University Examination Center Exam. No need to enter transfer admission.
5. In the event of multiple admission sessions during the year, such as Fall semester admission, a table should be created for each semester.
6. If a major is created within a department and has its own an intake capacity limit, a table should be created for each major.
7. Do not include exchange students as part of the international student enrollment.
8. Enter "0" when intake capacity is few in numbers.
9. When the law school is not receiving admissions based on master's having been completed or not, list as one group.

[University Notes]

The intake capacity limits on the graduate schools have not set for each semester separately (spring/fall). The ratio of "Enrollees(A)" to "Intake Capacity(B)" (referred as "A/B" in the tables) means the ratio of enrollees in spring semester to the full-year intake capacity.

Notes:

1. Fill in the values for the blank cells. Shaded cells will be calculated automatically.
2. Calculate the "A/B", the "Ratio of AY2015 Enrollee to Total Department Enrollee (%)", and "Ratio of AY2015 Enrollee to Total College Enrollee (%)" and round them off to two decimal places.
3. Make chart by each individual degree program such as college, department, master's program, doctoral program, and professional graduate schools.
4. The "Type of Entrance Exam" column should be created according to the actual university circumstances. However, the "Regular Entrance Exam" column should include the University Examination Center Exam. No need to enter transfer admission.
5. In the event of multiple admission sessions during the year, such as Fall semester admission, a table should be created for each semester.
6. If a major is created within a department and has its own an intake capacity limit, a table should be created for each major.
7. Do not include exchange students as part of the international student enrollment.
8. Enter "0" when intake capacity is few in numbers.
9. When the law school is not receiving admissions based on master's having been completed or not, list as one group.

[University Notes]

The intake capacity limits on the graduate schools have not set for each semester separately (spring/fall). Thus, in the interest of calculation, both semester's limits are combined in the spring semester table(as an annual limit), which leaves the related rows in the fall semester table zero.
